Visible Data  
Suite 825, 603 – 7<sup>th</sup> Avenue SW  
Calgary AB  
T2P 2T5

Attn. Ms. Patricia Sunstrum:

As requested this letter was drafted as a follow up for the project work that Visible Data has preformed for BP Canada Energy.

The Visible Data database and created flow schematics have proven to be effective and cost efficient in more ways then originally thought. Since our use of the your system we have been able to increase knowledge of general flow through our gathering systems which has created many optimization and efficiency opportunities in the field and office. This knowledge has helped our organization from operation understanding to tax applications. One of our proudest saving identified through using the Visible Data system has been a joint venture reconciliation project that identified over \$1 Million cdn credits to be billed back to BP Canada. The maps Visible Data created helped to accurately map 3<sup>rd</sup> party wells to BP facilities thereby making it easier to allocate operating costs appropriately.

Sincerely,

Shane D. Kerr  
EOC Corrosion / Integrity Coordinator
