Visible Data

I have been using the services of Visible Data for many years and have found it to be a valuable resource. Visible Data has provided me with accurate and easy to understand drawings of my pipeline systems and the corresponding PL100 data from the Alberta Energy and Utilities Board files. This information has been very useful in my Pipeline Integrity Management Programs.

Working for a large and dynamic company, the services of Visible Data has allowed me to keep abreast of my every expanding area of responsibility. This has been very crucial to the management of the companys largest sour gas gathering system.

Yours respectfully,

Don Normington
Facilities Integrity Co-ordinator
Peace Country South
Foothills and Frontier Business Unit
